

## Open Student Assistant Positions (HiWi) in Biorobotics and Biomechanics at ZITI Heidelberg (D. Häufle)

I currently have an opening for two HiWi positions:

Starting April 1st, I will start a new Lab at the ZITI Heidelberg in the field of Biorobotics and Biomechanics research.

I am looking for support in:

- Help to setup the new lab
- Prepare teaching examples for biorobotics
- Prepare teaching examples for biomechanical computer simulations

Ideally you have a keen interest and some prior experience on one or several of the following fields:

- Arduino programming and control
- Matlab/Simulink
- 3D printing and rapid prototyping
- Biomechanics computer simulations

If you are interested, please send a short motivation letter and, if you have, some examples of your work to:

[daniel.haeufle@uni-tuebingen.de](mailto:daniel.haeufle@uni-tuebingen.de)

You can find out about my current and future work here:

<https://www.hih-tuebingen.de/forschung/unabhaengige-forschungsgruppen/mocom/>

I am looking forward to your applications.

Daniel Häufle
